

## SkyView Risk Assessor for OS/400 & i5/OS

### What others are saying

"**SkyView Risk Assessor** meets our security and monitoring needs and provides automatically what Sarbanes-Oxley and internal auditors require. With **Risk Assessor**, we can look at Carol Woodbury's recommendations and make necessary changes to our OS/400 system. We can also auto schedule **Risk Assessor** to meet the auditor's requirements to identify remediation progress and to see if there have been any changes since last report."

*IT Director @ Chattanooga Group, the world leader in the manufacture and distribution of medical, physical rehabilitation and chiropractic equipment*

"(**SkyView Risk Assessor for OS/400**) offered exactly what would satisfy a security assessment of our OS/400 system and provide us with the peace of mind that security was configured according to industry best standards. Plus, the fact that (**Risk Assessor**) was developed by Carol Woodbury, who knows the platform and the operating system equally well, played a huge part in feeling comfortable with the decision to purchase the product."

*V.P @ Burke & Herbert Bank & Trust Company*

"We are constantly getting questions from our auditors regarding our annual audit and questions on settings on the 400, who has rights, who's on the system, what are system values set at. All this will be requiring more than we're going to be able to provide without **SkyView Risk Assessor for OS/400**."

*V. P. @ a New York based insurance company*

"(**SkyView Risk Assessor for OS/400**) provides a focused way to review security setup, validate security settings, to get ready for a security audit and (most importantly) provide the documentation we needed for our OS/400 security."

*Systems Analyst @ a Canadian municipality*

"We needed reassurance of appropriate OS/400 security. (**SkyView Risk Assessor for OS/400**) provides a way of getting ready for audits ahead of time; provides documentation required for audits & produces a (recognizable) 3rd party assessment (by Carol Woodbury) which is suitable for auditors and senior management."

*Manager @ Icon Health and Fitness*

"The risk mitigation recommendations generated by (**SkyView Risk Assessor for OS/400**) were so compelling that I immediately went to work implementing them. Then, I ran (**Risk Assessor**) again to document that the changes had worked as anticipated.

It's a great product!"

*Global Operations Manager @ an international dental supply company*
